

Research Approval Agreement

The signature of the principal investigator below confirms that the information in this application is exact and complete and all comments provided by the Research and Ethics Review Committee have been addressed. It assures that all care and use of animals in this proposal will be in accordance with the guidelines and policies of the Assiniboine Park Zoo. It also assures that prior to any deviations from this protocol being performed; the applicable veterinarian and RERC chair must approve an amendment. Substantial changes will require re-submission to the RERC.

It is understood that this approval is valid for one year and that protocols must be approved on an annual basis prior to the expiry date.

A summary report is required along with copies of publications that are produced. These materials should be provided to the Head of Conservation and Research.
