

HARVEST MOON SITE

Liuba Apostolova

For the design of the performance space I want to incorporate spaces that allow for people to gather, to do permaculture and to perform. The gathering space is also part of the performance space and is designed to seat between 10-15 people around an outdoor fireplace. The permaculture area is to be supported by the design of the structure and would be developed by the Harvest Moon over time. The performance space provides an open area that is partly sheltered to protect the equipment used during the Festival.

Permaculture is developed over time.

Structure as seen from the school.

Space is used during the rest of the year.

Performance space, seating area and fireplace.
