

HOMEWORK 3450

Suggestions regarding homework:

- ◇ Read ahead in the text, and come to class with some prior exposure to the subject material and with questions ready.
- ◇ Do all questions, or as many as you are able to do, out of each section of the text as soon as we cover the material in class. Bring prepared solutions and questions about what you had difficulty with to class. We will try to take some time each Thursday to discuss the homework.
- ◇ If you've mastered a particular kind of question you needn't do redundant questions of the same type just because they are there. Always try several of the more challenging questions even if you don't experience success; try to identify where your difficulties lie.
