

TABLE OF CONTENTS

Preface

Chapter 1 Complex Numbers

1.1	Introduction	1
1.2	Complex Numbers	3
1.3	Polar Representation of Complex Numbers	12
1.4	Exponential Form for Complex Numbers	18
1.5	Applications of the Exponential Form for Complex Numbers	22

Chapter 2 Complex Functions and Their Derivatives

2.1	Regions of the Complex Plane	29
2.2	Complex Functions	34
2.3	Limits and Continuity	43
2.4	Derivatives of Complex Functions	54
2.5	Harmonic Functions	68

Chapter 3 Elementary Complex Functions

3.1	Zeros and Singularities	72
3.2	Complex Exponential Function	75
3.3	Complex Trigonometric Functions	84
3.4	Complex Hyperbolic Functions	92
3.5	Complex Logarithm Function	95
3.6	Complex Powers	104
3.7	Inverse Trigonometric and Hyperbolic Functions	112
3.8	Steady-state Two-dimensional Heat Conduction	118
3.9	Electrostatics	125
3.10	Two-dimensional Fluid Flow	130

Chapter 4 Complex Integrals

4.1	Indefinite Integrals and Antiderivatives	138
4.2	Curves and Line Integrals	140
4.3	Contour Integrals	150
4.4	Independence of Path	155
4.5	The Cauchy-Goursat Theorem	160
4.6	Cauchy Integral Formulas	170
4.7	Bounds for Moduli of Analytic Functions	179
4.8	Applications to Harmonic Functions	183

Chapter 5 Power Series and Laurent Series

5.1	Infinite Sequences of Constants	194
5.2	Infinite Series of Constants	198
5.3	Complex Power Series	204
5.4	Taylor and Maclaurin Series	216
5.5	Laurent Series	232
5.6	Classification of Singularities	239
5.7	Analytic Continuation	246

Chapter 6 Residue Theory

6.1	Cauchy's Residue Theorem	250
6.2	Evaluation of Definite Integrals	257
6.3	More Improper Integrals by Residues	266
6.4	Summation of Real Series	279

Chapter 7 Conformal Mapping

7.1	One-to-one Mappings	283
7.2	Bilinear Transformations	289
7.3	Mappings to the Half-plane $\text{Im } w > 0$	303
7.4	Conformal Mappings	307
7.5	Conformal Mappings and Harmonic Functions	312
7.6	The Schwarz-Christoffel Transformation	322
7.7	Steady-state Two-dimensional Heat Flow	335
7.8	Electrostatic Potential	354
7.9	Fluid Flow	373

Chapter 8 Laplace Transforms

8.1	The Laplace Transform	398
8.2	Application of Laplace Transforms to Ordinary Differential Equations	408
8.3	Discontinuous Nonhomogeneities	414
8.4	The Complex Inversion Integral	425
8.5	Application of Laplace Transforms to Partial Differential Equations	433
8.6	Transfer Functions and Stability	449

Chapter 9 The Fourier Transforms

9.1	The Fourier Transform	460
9.2	Application of the Fourier Transform to Partial Differential Equations	474
9.3	The Fourier Sine and Cosine Transforms	482
9.4	Application of Sine and Cosine Transforms to Partial Differential Equations	487

Chapter 10 The z -Transform

10.1	The z -Transform	494
------	--------------------	-----

10.2	Application of the z -transform to First-order Difference Equations	501
10.3	Applications of First-order Difference Equations	506
10.4	Application of the z -transform to Second-order Difference Equations	509
10.5	Applications of Second-order Difference Equations	517
10.6	Transfer Functions and Stability for Discrete Systems	520

Appendix A Answers to Exercises
