TABLE OF CONTENTS

Preface

Chapter 1 Introduction to Differential Equations

1.1 Classification of Differential Equations 5
1.2 Qualitative Discussions of First-order Differential Equations and Direction Fields 18

Chapter 2 First-order Differential Equations

2.1 Existence and Uniqueness 26
2.2 Separable Differential Equations 30
2.3 Linear First-Order Differential Equations 39
2.4 Homogeneous First-Order Differential Equations 45
2.5 Exact Differential Equations 50
2.6 Integrating Factors 56
2.7 Bernoulli Differential Equations 62
2.8 Second-order Equations Reducible to First-order Equations 65

Chapter 3 Applications of First-order Equations

3.1 Exponential Growth and Decay Problems 71
3.2 Newtonian Mechanics 78
3.3 Population Dynamics 92
3.4 Chemical Reactions and Mixing Problems 100
3.5 Geometric Problems 105
3.6 Emptying Container Problems 108
3.7 Orthogonal Trajectories 115
3.8 Electric Circuits 118
3.9 Miscellaneous Applications 121

Chapter 4 Linear Differential Equations

4.1 Introduction to Linear Differential Equations 126
4.2 Superposition and Linear Independence 133
4.3 Homogeneous Linear Differential Equations 142
4.4 Homogeneous Linear Differential Equations With Constant Coefficients 150
4.5 Nonhomogeneous Equations and Undetermined Coefficients 158
4.6 Annihilators and Undetermined Coefficients 166
4.7 Variation of Parameters 171
4.8 Reduction of Order for Nonhomogeneous Equations 179
4.9 Cauchy-Euler Differential Equations 182

Chapter 5 Applications of Linear Differential Equations

5.1 Vibrating Mass-Spring Systems 188
5.2 Vibrating Mass-Spring Systems With Damping 196

5.3 Vibrating Mass-Spring Systems With External Forces 204
5.4 LCR Circuits 214
5.5 Beam Deflections 217

Chapter 6 Laplace Transforms

6.1 The Laplace Transform and its Inverse 223
6.2 Algebraic Properties of The Laplace Transform and its Inverse 230
6.3 Laplace Transforms and Differential Equations 241
6.4 Discontinuous Nonhomogeneities 250
6.5 Deflections of Beams and Laplace Transforms 260

Chapter 7 Systems of Differential Equations

7.1 Systems of First-order Differential Equations 266
7.2 Elimination Technique 273
7.3 Laplace Transform Solutions of Systems of Differential Equations 283
7.4 Matrix Methods for Systems of Linear First-order Equations 286
7.5 Nonhomogeneous Matrix Differential Equations 298
7.6 Variation of Parameters for a Particular Solution 303
7.7 Applications of Systems of Differential Equations 307

Chapter 8 Nonlinear Differential Equations and Systems

8.1 Nonlinear First-order Differential Equations 323
8.2 Nonlinear Systems and the Phase Plane 328
8.3 Nonlinear Springs 337

Chapter 9 Series Solutions of Differential Equations

9.1 Review of Power Series 341
9.2 Maclaurin and Taylor Series Solutions of Differential Equations 345
9.3 Power Series Solutions of Differential Equations 349
9.4 Ordinary and Singular Points for Second-order Linear Differential Equations 358
9.5 Frobenius Solutions of Differential Equations 362
9.6 Case 1 Frobenius Solutions 368
9.7 Case 2 Frobenius Solutions 371
9.8 Case 3 Frobenius Solutions 376
9.9 Legendre Polynomials 380
9.10 Bessel Functions 387

Chapter 10 Numerical Solutions of Differential Equations

10.1 Euler Methods 396
10.2 Runge-Kutta Methods 404
10.3 Multistep Methods 408
10.4 Numerical Methods for First-order Systems 410

Chapter 11 Fourier Series

11.1 Fourier Series 413
11.2 Fourier Sine and Cosine Series 424

Chapter 12 Partial Differential Equations of Mathematical Physics

12.1 Heat Conduction 438
12.2 Transverse Vibrations of Strings and Longitudinal Vibrations of Bars 447
12.3 Electrostatic Potential 456

Chapter 13 Separation of Variables

13.1 Linearity and Superposition 459
13.2 Separation of Variables 463
13.3 Nonhomogeneities and Eigenfunction Expansions 478

Chapter 14 Boundary-value Problems and Sturm-Liouville Systems

14.1 Boundary-value Problems 497
14.2 Sturm-Liouville Systems 498
14.3 Generalized Fourier Series 506
14.4 Homogeneous Problems 518

Appendix A The Gamma Function 525

Appendix B Review of Matrix Algebra 527

Appendix C Vector Analysis 561

Appendix D Answers to Even-numbered Exercises 566
