=====  
Examples of formatting strings for a floating point variable  
=====
```

```
val =
```

```
    3.14159265358979
```

```
val (in f format) =    3.14159
```

```
val (in e format) =    3.1416e+000
```

```
=====  
Examples of formatting strings for an integer variable  
=====
```

```
Count (decimal) = 25
```

```
Count = (octal) = 31
```

```
Count = (hexadecimal) = 19
```

```
Count value is equal to 025 units.
