1. Course Description

The main goals of this course will be to develop and practice the basic methods of computing the properties of functions of one variable together with their derivatives and integrals. In other words, functions of one variable and their local and global behavior based on local data are in the focus of our studies.

The course will present an introduction to *differential calculus*. The notion of the instantaneous rate of change of a variable is formalized in the concept of the derivative of a function. Typical applications to the physical world include velocity, acceleration, rate of growth of populations, and more.

The course will present an introduction to *integral calculus*. This is the inverse to differential calculus. In integral calculus you will learn how to compute various areas and how to reconstruct a function out of its initial data and derivative.

These two aspects of calculus together with their interplay are a part of the standard curriculum, with profound applications in the contemporary technological world.

8. Student Accessibility Services

ICM and the University of Manitoba are committed to providing all students equal access to learning opportunities. "This means that our classroom, our virtual spaces, our practices, and our interactions should be as inclusive as possible. Mutual respect, civility, and the ability to listen and observe others carefully are crucial to universal learning."
Student Accessibility Services (SAS) is the office that works with students who have permanent, chronic, or temporary disabilities to provide and/or arrange reasonable accommodations.

- **Students who have, or think they may have, a disability (e.g. mental health, attentional, learning, vision, hearing, physical, medical or temporary), are invited to contact Student Accessibility Services to arrange a confidential discussion at (204) 474-7423 (V), (204) 474- 9790 (TTY) or student_accessibility@umanitoba.ca.**
- **Students registered with Student Accessibility Services and who have a letter requesting accommodations are encouraged to contact the instructor early in the semester to**

discuss the accommodations outlined in their letter. Additional information is available at the Student Accessibility Services website: www.umanitoba.ca/student/saa/accessibility/

9. Expectations

Students can expect a class format consisting of a lecture period, a break/work period, a further lecture period and a final break/work period. Worksheets will be provided. Lab periods will generally consist of a brief quiz (10 minutes or so) following a series of lab exercises. There are no make-up tests or quizzes.

Students are expected to attend each class and lab period regularly; to arrive in class and in the lab on time; to work diligently on the worksheets during the class work period; to avoid texting, twittering, tweeting, using Facebook and/or any other electronic communication during class; to do promptly the suggested homework from the text; and to complete the lab exercises. In the event of a missed test students must provide a medical note to the ICM office in which case the marks for the term test will be moved to the final exam.

10. Academic Integrity, Policy on Plagiarism and Cheating

Academic Integrity refers the values on which good academic work must be founded: honesty, trust, fairness, respect and responsibility. Academic integrity includes a commitment not to engage in or tolerate acts of falsification, misrepresentation or deception. Such acts of dishonesty violate the fundamental ethical principles of the College community and compromise the worth of work completed by others.

Note, in particular that cell phones and pagers are explicitly listed as unauthorized materials, and hence may not be present during tests or examinations.

International College of Manitoba regards acts of academic dishonesty in quizzes, tests, examinations or assignments as serious offenses and may assess a variety of penalties depending on the nature of the offense.

Students found to have breached the regulations related to any form of academic misconduct including but not limited to examination personation, plagiarism and cheating will be subject to the following measures:

- **First Offense: Awarded "0" for the assessment and given a permanent record on their file.**
- **Second Offense: Awarded "0" for the course, regardless whether the offense was committed in the same course or another course.**
- **Third Offense: Risk expulsion from ICM and the cancellation of Study Permit.**

It is solely the student's responsibility to be aware of Academic Integrity Policy and consequences of violating it. The policy is available in the Student Academic Handbook, accessible on Student Portal.

International College of Manitoba condemns all forms of cheating.
