NAME

Standard supplied configuration files

DESCRIPTION

MASE is distributed with several ''Pre-made'' configuration files. Most of these are configuration files for *OUTPUT-ALIGNED.* Others have some key mappings. All might serve as useful tutorials.

=/colors.cp7.aa
: For *OUTPUT-ALIGNED.* Will generate different colors for a set of amino acids, configured for an NEC CP7 color printer.

=/colors.cp7.patterns
: For *OUTPUT-ALIGNED.* Will generate different colors for different pattern numbers, configured for an NEC CP7 color printer.

=/colors.la100.patterns
: For *OUTPUT-ALIGNED.* Pattern printing for DEC-LA100 (has only bold/underlined or regular).

=/colors.nec.aa
: For *OUTPUT-ALIGNED.* To print amino acid classes in color on NEC APC III personal computer.

=/colors.nec.na
: For *OUTPUT-ALIGNED.* To print nucleic acid classes in color on NEC APC III personal computer.

=/colors.nec.patterns
: Pattern colors on NEC APC III

=/colors.startstop
: For *OUTPUT-ALIGNED.* Generate patterns for *BOXER* program.

=/keys.dna
: Some key mappings and bindings useful for editing nucleic acid sequnces.

=/keys.dna.new
: Some key mappings and bindings useful for editing nucleic acid sequnces. Does not map lower to upper case.

=/keys.protein
: Some key mappings and bindings useful for editing nucleic acid sequnces.

=/keys.protein.new
: Some key mappings and bindings useful for editing nucleic acid sequnces. Does not map lower to upper case

In MASE home directory - Maserc
: System wide *MASE* initialization file.
