

Title: Semi-parametric small-area estimation by combining time-series and cross-sectional data

Authors: Farhad Shokoohi and Mahmoud Torabi

E-mails: shokoohi@icloud.com  
Mahmoud.Torabi@umanitoba.ca

The R file Program\_HACCD.R produces the results of Section 5.1 (Figures 1 and 2; and Table 10).

The HACCD data, in the directories of Adj\_monthly\_total\_prec and Homog\_monthly\_mean\_temp, are used in the R code to run the appropriate model.
